

TAYA INFRATECH

(formerly known as Shree Sadguru Industries)

Engineering precision. Construction strength.

Integrated engineering, fabrication and infrastructure execution for demanding projects across India.

COMPANY PROFILE | 2026

COMPANY OVERVIEW

Experience carried forward. Ambition focused ahead.

Taya Infratech LLP brings engineering and construction capability together in one project-focused organization.

OUR FOUNDATION

Built for larger, more demanding projects

The company was created to pursue larger opportunities while carrying forward the industry experience associated with Shree Sadguru Industries, established in 1980.

Our work is organized into two clear divisions: Engineering and Construction - supported by practical planning, disciplined execution and a commitment to durable outcomes.

1980
LEGACY FOUNDATION

02
CORE DIVISIONS

23
SPECIALIZED CAPABILITIES

How we work

01
Understand
Scope, site, drawings and objectives

02
Plan
Method, materials, resources and controls

03
Execute
Coordinated fabrication and site activity

04
Deliver
Inspect, document and hand over

DIVISION 01

Engineering

Fabrication, industrial systems and specialized equipment engineered around real project requirements.

01 **Heavy & Light Fabrication**
Structural, industrial and custom-engineered fabrication.

02 **Outdoor Hoardings**
Large-format structures engineered for site conditions.

03 **Toll Plaza Structures**
Fabricated systems for toll-plaza infrastructure.

04 **Signage Gantries**
Overhead and roadside highway signage structures.

05 **Plant Fabrication**
Plant structures, assemblies and custom components.

06 **Cement Silos**
Storage silos and related steel components.

07 **Acoustic Enclosures**
Sound-control enclosures for industrial equipment.

08 **Starch & Paper Mill Fabrication**
Equipment and structural components for process plants.

09 **Precast Moulds**
Custom moulds for repeatable concrete production.

10 **Mobile Lighting Masts**
Mobile lighting for sites and emergency operations.

11 **Mobile Toilet Vans**
Purpose-built mobile sanitation units.

12 **Solid-Waste Handling Equipment**
Systems and mobile equipment for waste operations.

13 **Porta Cabins & Prefabricated Structures**
Portable offices, cabins and site accommodation.

14 **Lime Spreaders**
Controlled spreading equipment for construction use.

DIVISION 02

Construction

Civil and infrastructure solutions for protection, retention, access and ground performance.

01 **Riverbank Protection Works**
Erosion-control and stabilization systems for vulnerable riverbanks.

02 **Seashore Protection Works**
Coastal solutions designed around shoreline conditions and durability.

03 **Gabion Retaining Walls**
Durable, permeable retention for slopes, roads and waterways.

04 **Gabion-Facia Reinforced-Soil Walls**
Integrated reinforced-soil structures with gabion facia.

05 **Reinforced-Earth Walls**
Earth-retention systems for highways and grade separation works.

06 **Cement-Concrete Roads**
Durable road surfaces for industrial and infrastructure use.

07 **Canal-Lining Works**
Civil works that improve water conveyance and limit seepage.

08 **Reservoir-Protection Works**
Protection for reservoir edges, slopes and water infrastructure.

09 **Ground-Improvement Works**
Site-specific treatment and stabilization supporting safe construction.

Protection + retention + access + ground performance

Solutions are planned around site conditions, design requirements, constructability and long-term performance.

PROJECT EXPERIENCE

Capability shaped by practical delivery

From fabrication floors to live infrastructure environments, our approach is grounded in constructability and accountable execution.

INDUSTRIAL FABRICATION

RIVERBANK PROTECTION

REINFORCED-SOIL WORKS

MOBILE INFRASTRUCTURE

OUR EXECUTION PRIORITIES

- Fit-for-purpose engineering
- Practical site coordination
- Controlled workmanship
- Durable, maintainable outcomes
